S.F. 380/H.F. 393 are bills attempting to impose barriers on parents before they exercise their fundamental right to decline vaccines under MN's legal exemptions!

Minnesota S.F. 380/H.F. 393 seeks to make opting out of childhood vaccinations more difficult for MN parents. Under current law, parents can opt children out of vaccination for medical reasons if approved by doctors, or because they hold conscientiously held beliefs if they present notarized forms to their schools. But, SF 380/HF 393 would require those parents to first talk to a Physician and obtain a statement from the physician verifying that the physician has reviewed with the parent information about the risks and benefits of the vaccines that is consistent with information published by the Centers for Disease Control and Prevention.

Please help stop this attempt to set up hurdles for parents before they exercise their fundamental rights to direct the health choices and wellness path of their children.
