Please support AB295 because it is the perfect solution for Nevada's long term desire to have a law that protects access to its thousands of traditional, complementary and alternative health care practitioners such as herbalists, traditional naturopaths, wellness consultants, and many others who are providing great services to health seekers in Nevada.

The new law, already passed in eight other states, would provide a state exemption for those non-invasive complementary and alternative health care practitioners who avoid a specific list of prohibited conduct, such as puncturing the skin or administering prescription drugs or telling people to go off their treatments recommended by their licensed health care professional, and who give out the disclosure information listed in the bill, such as contact information, education and training, and the nature of the services to be rendered.

Nevada Health Seekers deserve to have maximum options protected for themselves as they work to explore and their wellness and health. **[Click Here to Take Action and Support AB295.](#)**
