### **Eleven Year Old Sarah Hershberger And Her Parents In Hiding To Avoid Dangerous Court Ordered Chemotherapy For Sarah**

**Do you believe you have the right to refuse chemotherapy** for your child? Do you believe you can go get a second, third, or fourth opinion or use natural healing for curing your child of cancer? Ohio Courts have ordered that Sarah Hershberger receive chemotherapy against her and her parents' wishes and that a hospital affiliated third party nurse/attorney be appointed as guardian and replace Sarah Hershberger's parents' medical decision making authority, forcing Sarah to resume chemotherapy.

**Parents across the country are on the alert and vigilant**, watching the outcome of Sarah's legal case which has now been appealed to the Ohio Supreme Court. Sarah, her parents, and Sarah's youngest out of seven siblings, have gone into hiding to protect themselves from government interference with their medical choices. It is NHFA's understanding that Sarah is cancer free after using natural treatments and that the Hershbergers are homesick and heartsick.

**NHFA believes that parents' rights and liberty interests should be protected at all costs** when responsible thoughtful parents are working to discern the path of wellness and health for their children. Especially when lethal toxic substances are being recommended for life threatening situations, the parents are best equipped to make the life and death decisions for their children. The state has no business imposing its values into the homes of families that are responsible and working to save their own children's lives. The Hershbergers are suitable, dedicated parents, who are far from negligent, and most deeply committed to the health and well-being of their daughter Sarah.
