

NATIONAL HEALTH FREEDOM ACTION

Please Oppose Oklahoma Vaccine Coercion Bill SB83

Oklahoma's Senator Yen is attempting to coerce citizens into viewing government materials!!! Bill SB83 mandates parents must listen to government endorsed medical videos before being allowed to decline vaccines for their children! SB83 would marginalize and threaten parental rights. The original bill took away all the currently protected rights of parents to decline vaccines for their children, and this bill is being touted as a compromise! It is an Un-American compromise at that! Forced coerced viewing of government materials is completely offensive and unacceptable!!

If you live in Oklahoma [Take Action Here](#).

SB83 would coerce parents into watching government website presentations before a parent could exercise their right to make a medical decision regarding vaccines for their children.

SB83 would prohibit children from attending school unless they received all the government recommended vaccines, or unless parents first watched a government presentation on a government website and notarize that they have watched it regarding vaccines, or unless their doctor verified that a physical condition of the child is such that immunization would endanger the life or health of the child. Parents would lose their current right to object to vaccinations in writing and decline vaccines based on their own parental decision.

To be a truly great and honorable country we need to protect the fundamental right to make our own health decisions including accepting or declining vaccines or other injections or treatments recommended by government! We need to resist government coercion practices that infringe on our personal liberties!

SB83 is COMPLETELY UN-AMERICAN. If the Oklahoma bill passed, it would fundamentally change and destroy the constitutional relationship between government and citizens! Protection of our freedom of thought, freedom of speech, freedom of our bodily integrity and personal and domestic sovereignty has been an American guarantee and protected by the "law of the land" for decades. We will lose the essence of American liberty if government can coerce citizens into forced medical treatments!

Read the bill and check its status [here](#).
